

LEADREACHER + STATFLO

Qualified outreach integration

Turn approved Statflo audiences into
personalized, reviewable outreach at scale.

SMART LISTS

PERSONALIZED VIDEO

COMBINED REPORTING

**Each platform does what it does
best.**

Statflo owns customer records and compliant conversations.
LeadReacher handles audience intelligence, personalized
outreach and campaign reporting.

PROPOSED STATFLO INTEGRATION

Start with an approved Smart List.

A practical pilot that adds LeadReacher audience intelligence and personalization without changing who owns the customer relationship.

- ✓ **Statflo remains the system of record**
Customer records, assignments and compliant conversations stay in Statflo.
- ✓ **LeadReacher prepares the outreach**
Relevant audiences, personalized messaging and video are prepared for review.
- ✓ **Approval comes before launch**
New prospect outreach remains subject to consent, channel and jurisdictional rules.

PROPOSED PILOT FLOW

CURRENT LEADREACHER PRODUCT

Campaign operations already exist.

LeadReacher already supports the campaign workflow that would power the proposed Statflo integration.

- Prepare and review campaigns**
 Drafts and readiness checks keep the work visible before launch.
- Support multiple outreach channels**
 Delivery can be matched to the audience and eligible channel.
- Track campaign outcomes**
 Sent messages, replies and meetings stay connected to the campaign.

CURRENT PRODUCT SCREEN

The Statflo Smart List connection is proposed. The campaign controls shown here are available today.

CURRENT LEADREACHER PRODUCT

Conversation management already exists.

LeadReacher can surface replies with the person, channel and campaign context needed for follow-up.

✓ **Replies stay visible**
Teams can see who replied and which campaign started the conversation.

✓ **Context stays attached**
The contact, channel and message history remain together.

✓ **Statflo owns the customer conversation**
The proposed integration would return relevant activity to Statflo for compliant follow-up.

CURRENT PRODUCT SCREEN

Personalized video inside Statflo is proposed. The conversation view shown here is available today.

TWO WAYS TO START

Two ways to integrate.

Both options add differentiated outreach capability while keeping Statflo at the centre of the customer relationship.

MODEL 1

Dedicated outreach module

The enterprise outreach engine

A native LeadReacher module inside Statflo for Smart Lists, audience expansion, personalized video, bulk campaigns and reporting.

Best for platform-wide capability

Tiered enterprise fee

MODEL 2

Additional contact channel

The utility layer

An Outreach action on each Statflo contact for advanced single-contact messaging and video, without bulk audience tools.

Best for a fast, low-friction launch

Per use or pay as you go

START SMALL, PROVE VALUE

A focused Smart List pilot.

A controlled first step that tests audience quality, personalization, approvals and reporting before a deeper rollout.

BEST LONG-TERM CONNECTION

Use Statflo's partner API where available, with CSV or SFTP as a practical fallback.

Confirm support for contacts, Smart Lists, campaigns, rep assignments, opt-outs, conversation events and deep links. Needed: sandbox, API and webhook documentation, rate limits and data-retention requirements.
