

LEADREACHER + STATFLO

Qualified outreach integration

Turn approved Statflo audiences into
personalized, reviewable outreach at scale.

SMART LISTS

PERSONALIZED VIDEO

COMBINED REPORTING

**Each platform does what it does
best.**

Statflo owns customer records and compliant conversations.
LeadReacher handles audience intelligence, personalized
outreach and campaign reporting.

THE INTEGRATION

One audience. Five connected steps.

A proposed workflow that keeps Statflo at the centre of the customer relationship.

STATFLO OWNS

Customer records, assignments and compliant conversations

LEADREACHER OWNS

Audience intelligence, personalization, outreach and reporting

ILLUSTRATIVE BUSINESS CASE

More qualified conversations create the upside.

Example assumptions only. Replace with Statflo data before external use.

REVENUE MODEL

Eligible audience × positive reply rate × qualification rate × opportunity value

Validate each input with Statflo

THE FIRST PILOT

Start small. Prove value. Then scale.

One approved Smart List gives both teams a controlled way to test the integration.

TWO COMMERCIAL PATHS

Launch lightly or build the full engine.

Both paths build on LeadReacher capabilities available today.

PROPOSED CONCEPT

STATFLO CONTACT

Sarah Kim

Common Thread | Existing customer

OUTREACH

Single-contact messaging and personalized video

PATH 1

Contact-level channel

Fast pilot

Per use

PROPOSED CONCEPT

LeadReacher outreach

Smart Lists • Audiences • Campaigns • Reporting

PATH 2

Dedicated outreach module

Full platform capability

Enterprise fee

THE DECISION

Agree on one pilot and three inputs.

The goal is to validate commercial value before committing to a deeper integration.

30

DAY PILOT

One audience. One use case. Shared measurement.

01

AUDIENCE

Choose the first approved Smart List and use case.

02

ACCESS

Confirm API support, sandbox access and fallback options.

03

SUCCESS

Agree on reply, opportunity and revenue measures.

Preferred connection: Statflo partner API. Practical fallback: CSV or SFTP.
